Subject: Documentation of Telephone Conversation - Jerry Parks

MINE FILES: S/041/013 AND S/023/009

I received a telephone call from Mr. Gerald Park this morning in response to his receipt of our annual report forms for two small mining permits that his son (Kelly Park) has on file with this office. The two operations in question are: Aggra-Insulite Corp., Aggre lite Mine - S/041/013, and Elemite Minerals Corp., Painted Rocks Mine - S/023/009. Mr. Park indicated that neither he or his son have any further to do with these operations and haven't for some period of time now.

Mr. Park indicated that he has been out of the country in Peru since this past spring and that before he left, he sent a letter and permit transfer forms to Mr. Jack Grover (Alpha Geolocigal) and Mr. Richard Michaels (Elemite Minerals??) that are now controlling/operating these mining projects. To date, he has not received a response from these individuals. He stated that he has also tried to contact both parties by phone and that they have not returned his calls.

Mr. Park indicated that nearly 3 years ago they lost their lease option from the Dastrup (spl. ??) family who apparently held the Aggra-Insulite property. It was his understanding that a Mr. Bruce Allen is the new leasee on this property. He stated it was his understanding that the new operator has mined additional aggregate from this site under a mineral materials sale from the USFS (Richfield office?).

He also stated that he believed that Mr. Kelly Jones (and not his son Kelly Park), was involved in the alledged unauthorized sale of ore material from the Elemite Minerals mine site.

I asked Mr. Park to send us a letter explaining the specific details/circumstances of each site so that we can have a written record of the transactions that have taken place. I indicated that this information would be used as a basis in helping us determine what actions should be taken next to resolve this matter.

This note will be copied to both mine files.
